## **BEST AVAILABLE IMAGES**

Defective images within this document are accurate representations of the original documents submitted by the applicant.

Defects in the images may include (but are not limited to):

- BLACK BORDERS
- TEXT CUT OFF AT TOP, BOTTOM OR SIDES
- FADED TEXT
- ILLEGIBLE TEXT
- SKEWED/SLANTED IMAGES
- COLORED PHOTOS
- BLACK OR VERY BLACK AND WHITE DARK PHOTOS
- GRAY SCALE DOCUMENTS

**IMAGES ARE BEST AVAILABLE COPY.**

**As rescanning documents *will not* correct images,  
please do not report the images to the  
Image Problem Mailbox.**

Field Name	Data Type	Description
ProjectID	AutoNumber	Unique Number indexing Model Projects
ProjectName	Text	Reference Name for Model Project
ProjectType	Text	Type of Model to be constructed (Response, Clone, Suppression, ....)
ProjectGoal	Text	Analyst-defined goal for current Model Project
ProjectBeginDate	Date/Time	Identifying Time Stamp for first use
ProjectEndDate	Date/Time	Last used Time Stamp
ProjectDataset	Text	Full pathname reference to Development dataset
ProjectDataDictionary	Text	Full pathname reference to metadata and Model status and data
ProjectLog	Text	Full pathname reference to log of Analyst decisions
DependentVariable	Text	Target variable selected for Model
ModelFitnessCriterion	Number	Desired c-index for Model set by Analyst
ModelPerformanceCriterion	Number	Desired zone of positive Model Gain set by Client
ModelPerformanceMonotonicityCriterion	Number	Desired level of Monotonicity
DevelopmentDatasetSize	Number	Total number of records in Development Dataset
PositiveOutcomes(%)	Number	Number of successful outcomes as a percent of Development Dataset Size
SampleSize(%)	Number	Size of Training Sample as a percent of total Development Dataset Size used for Candidate Model
VariableCount	Number	Initial Number of Predictor Variables
SampleDistribution	Hyperlink	Distribution of Predictor Variables: Graphs and Statistics
SampleByDistribution	Hyperlink	Distribution of Predictor Variables for Positive and Negative Outcomes
Interaction Tree	Hyperlink	Cross-validated Partition Tree for Key Predictor Variables
DimensionReductionMissingFilter	Number	Number of Predictor Variables Eliminated for Missing Variables
DimensionReductionCutoff	Number	Cutoff set by Analyst for Percent of Missing Values Acceptable
DimensionReductionMainEffects	Number	Number of Predictor Variables Retained for Main Effects
DimensionReductionMainEffectsCutoff	Number	Cutoff set by Analyst for Significance of Main Effects
DimensionReductionInteractionEffects	Number	Number of Predictor Variables Retained for Interaction Effects
DimensionReductionInteractionEffectsCutoff	Number	Cutoff set by Analyst for Significance of Interaction Effects
DimensionReductionVariableCount	Number	Number of Predictor Variables resulting from Dimension Reduction
CandidateModelChoice	Text	Model Type applied to Dimension Reduced Dataset
CandidateModelChoiceConstraint	Number	Retention Cutoff or Significance Level for Model Variables
CandidateModelResults	Hyperlink	Model Fitting Results
CandidateModelLiftChart	Hyperlink	Model Non-cumulative Lift Chart
CandidateModelPersistenceChart	Hyperlink	Model Persistence Chart for Key Variables
ValidationMethod	Text	Method Selected for Model Development Process Validation
ValidationMethodResults	Hyperlink	Model Application to Validation Dataset(s) Results
ValidationMethodLiftChart	Hyperlink	Model Validation Lift Chart
FinalModelResults	Hyperlink	Model Development Process applied to full Development Dataset Results
FinalModelLiftChartComparison	Hyperlink	Final Model applied to Sample and Validation Datasets for Cumulative Lift
FinalModelNonCumulativeLiftChartComparison	Hyperlink	Final Model applied to Sample and Validation Datasets for Non-cumulative Lift
FinalModelEquation	Text	Model Parameterized Equation using Model Transformed Variables
ScoringDataset	Text	Full pathname reference to Scoring File Input Dataset
DevelopmentScoringComparison	Hyperlink	Key Variable Comparison on Decile Basis
DevelopmentScoringDistributionComparison	Hyperlink	Propensity Score Distribution for Development and Scoring File (Subset)
ScoredResults	Text	Full pathname reference to Scoring File Output Dataset
InsightProfileMethod	Text	Method for Ranking Customer Insight Variables
InsightProfile	Hyperlink	Ranked List of Key Variables
InsightProfileChart	Hyperlink	Insight Chart of Key Variable Differential Contribution
FinalReportEntry	Memo	Final Report Description and Comments

Review Predictors

FIG. 22

The image shows a software dialog box titled "Model Selection Palette". It contains three main sections for different statistical methods. The first section, "Stepwise Logistic Regression", is selected with a radio button. It includes a "Logit Regression Method" group with "Maximum Likelihood" selected and "Ordinary Least Squares" unselected. A "Logit Regression Mode" group has "Mixed" selected, with "Forward" and "Backward" unselected. Below these are "Significance Levels for Predictor Variable Status Change" with "Entry" and "Retain" both set to 0.30. The second section, "Stepwise Linear Discriminant Analysis (General Location Model)", is unselected. It includes an "LDA Regression Assumptions" group with "Equal Variances", "Box Test", and "Normal Distribution" all unselected. An "LDA Regression Mode" group has "Mixed", "Forward", and "Backward" all unselected. Below these are "Significance Levels for Predictor Variable Status Change" with "Entry" and "Retain" both set to 0.30. The third section, "Test for Model Variable Persistence", is selected with a checked checkbox. It includes "Significance Levels for Predictor Variable Status Change" with "Entry" set to 0.25 and "Retain" set to 0.025.
